Software Engineering graduate from WGU with hands-on experience maintaining and adding content to a professional website as well as working on personal full stack web development using Typescript and PostgreSQL. I am currently seeking a data analyst or process analyst role where I can use my technical and organizational skills. Check out my website to see more about some work I have been currently working on.

PROFESSIONAL EXPERIENCE

Website Maintenance Associate at All In One Reality | 2022 - 2023

- Completely reworked the website from a largely static site to one which is fully interactive.
- Maintained the day-to-day functionality
- Updated content on website
- Fixed front-end issues as they arose
- Responded to requests made by my employer and implemented them

EDUCATION

Western Governors University (WGU) | 2024 - 2026

- Bachelor of Science in Software Engineering
